Early Access Program Options for Winter 2020

CODE	WINTER 2020 COURSE OFFERINGS (JAN 6, 2020 – APR 3, 2020)	DAY	TIME
ADMN 1016A	**Introduction to Canadian Business** This course surveys the core concepts and topics in business and management. Topics include the function and role of small to large for-profit and not-for-profit organizations, and service and production oriented organizations within the context of the domestic and global environment. The basic principles of management, finance, marketing, organizational theory, human resources, general operations, and decision processes are introduced. Students may not retain credit for both ADMN 1016 and ADMN 2006. This is a 3-hour lecture each week during the Winter Session. 3 credits.	Thu	7:00 PM – 10:00 PM
ADMN 1127A	**Introductory Financial Accounting II** This course builds on the foundational concepts of ADMN 1126 and positions students for further study of accounting at the university level. Topics covered will include partnership accounting, shareholders' equity accounts and corporate reporting, accounting for short-term and long-term liabilities, accounting for manufacturing concerns, budgets and standards, financial statement analysis, reporting and analyzing cash flows, and introduction to deferred taxes. Students may not retain credit for both ADMN 1127 and 1107. Prerequisite: ADMN 1126. This is a 3-hour lecture each week during the Winter Session. 3 credits.	Wed	7:00 PM - 10:00 PM
ADMN 1207B	**Quantitative Management Decision Making** This course examines the role of the manager in the contemporary organization and the issues which influence management and administration decision making in both the public and private sectors. Coverage of topics includes environmental analysis, planning, decision making, implementation and performance measurement. Decision processes are studied in detail using the case study method. Also examined are theories of management skill development and how they can be applied in the workplace. Students may not retain credit for both ADMN 1207 and ADMN 1017. Pre-requisite: successful completion of all program admission requirements and ADMN 1206. This is a 3-hour lecture each week during the Winter Session. 3 credits.	Mo	7:00 PM - 10:00 PM
ADMN 1306A	**Commercial Law** This course examines the legal rights and duties of buyers, sellers, employers and employees in Canadian law. Topics discussed will include contracts, insurance, negotiable instruments, business forms, property and credits. This is a 3-hour lecture each week during the Winter Session. 3 credits.	Tu	7:00 PM - 10:00 PM
ANTR 1007	**Introduction to Cultural Anthropology** Provides a general introduction to social/cultural anthropology (a general survey of the field, with a concentration on the comparative analysis of culture, using examples from different societies around the world); anthropological linguistics (focusing on the origin, structure, distribution and social/cultural aspects of human languages) and applied anthropology (the identification and resolution of practical problems via anthropological methods). Students cannot retain credit for both ANTR 1005 and ANTR 1007. This is a 1.5-hour lecture two times each week during the Winter Session. 3 credits.	Tu & Thu	4:00 PM - 5:30 PM
CESD 1007	**Introduction to Community Economic & Social Development II** This course introduces students to the major processes and practices of CESD including community participation and mobilization; community organizing; and community healing as part of the development process. This course will provide students with a strengths-based approach to CESD practice. By using the Development Wheel, students will learn to analyze the community and determine CESD priorities. Students will be introduced to an effective method of conducting both short-term and strategic planning and identifying community resources. This course will be practice-oriented with students participating in a variety of exercises designed to develop group facilitation skills, popular education and community organizing and development skills. Attendance at the course lab or "Learning Community" is a required component of the course. Prerequisite: CESD 1006 or permission of the department. This is a 1.5-hour lecture two times each week during the Winter Session along with a 1.5 hour Lab each week. 3 credits.	Mon & Wed	4:00 PM – 5:30 PM

Early Access Program Options for Winter 2020

CODE	WINTER 2020 COURSE OFFERINGS (JAN 6, 2020 – APR 3, 2020)	DAY	TIME
COSC 1701A	**Computer Applications I** This is a general introductory course in personal computing with special emphasis on the applications of microcomputers. The general concepts of computing will be reviewed. Students will gain practical experience in the use of software including word processors, spreadsheets and database systems. This is an online course with a tutorial each week. 3 credits.	ONLINE	ONLINE
COSC 1702A	**Computer Applications II** This course is designed to teach the student to effectively use spreadsheet software. It will focus on more advanced features of Microsoft Excel - including PivotTables and PivotCharts, advanced formulas and functions, database management, financial functions and what-if analyses, date and time arithmetic, external data usage, report generation; and built-in graphics support. Students will gain sufficient knowledge to become sophisticated users of Microsoft Excel. This is a 1.5-hour lecture two times each week during the Winter Session along with a tutorial each week. 3 credits.	Mon & Wed	4:00 PM – 5:30 PM
COSC 1702B	**Computer Applications II** See description above, just offered at a different time. This is a 1.5-hour lecture two times each week during the Winter Session along with a tutorial each week. 3 credits.	Thu	7:00 PM – 10:00 PM
ECON 1007B	**Introduction to Macroeconomics** Topics include: national income; inflation; unemployment; taxation; exchange rates; money and banking; monetary policy; and fiscal policy. This is a 1.5-hour lecture two times each week during the Winter Session along with a tutorial each week. 3 credits.	Mon & Wed	5:30 PM – 7:00 PM
ENGL 1802A	**Critical Writing: Who Do You Think You Are?** This course takes as its premise Margaret Atwood's claim that [w]e have to write out of who and where and when we are, whether we like it or not, and disguise it how we may. It prepares students to be successful in their university writing by approaching the question Who Do You Think You Are? from a variety of disciplines via the study of a range of texts that offer answers to this question. This course is designed to give students from any discipline the critical reading, thinking, writing, and research skills that will provide a foundation for success in their university studies. Students are encouraged to take this course early in their program. This is a 3-hour lecture each week during the Winter Session. 3 credits.	Tu	4:00 PM – 7:00 PM
FREN 1407AF	**Communication and Culture II: Reading for Pleasure (French)** This course is designed to help students improve their written and oral French comprehension and communication skills. Students will read an interesting selection of contemporary francophone stories and short novels. Discussion groups, oral presentations and short essays provide students with oral and written practice. Language skills will also be addressed through grammar review and vocabulary enhancement. Prerequisite: FREN 1406 or permission of the instructor. This is a 1.5-hour class three times a week during the Winter Session. 3 credits.	Mo & Wed & Thu	4:00 PM – 5:30 PM
OJIB 1017A	**Introductory Anishinaabemowin II** This course builds on the concepts acquired in OJIB 1016 and introduces students to the concepts necessary to expand their vocabulary and to be able to converse and answer questions in the Anishinaabe language while communicating about a variety of topics. Students continue to examine relationships of Anishinaabe language to various cultural concepts. Students may retain credit for only one of OJIB 1017, ANIS 1017, and OJIB 1005. Prerequisite: OJIB 1016. This is a 2-hour lecture two times each week. 3 credits.	Mon & Wed	5:00 PM – 7:00PM
PHIL 1116A	**Critical Thinking** This course will introduce the basics of informal logic, including analytical reading, critical thinking, argument analysis and construction, and problem solving. Enough of the rudiments of formal logic will be presented to assist in critically evaluating inferences. (LEC 3). This is a 1.5-hour class three times a week during the Winter Session. 3 credits.	Mon & Wed	5:30 PM – 7:00 PM

Early Access Program Options for Winter 2020

CODE	WINTER 2020 COURSE OFFERINGS (JAN 6, 2020 – APR 3, 2020)	DAY	TIME
PHIL 1117	**Introduction to the Problems of Philosophy** This course introduces students to the "Big Questions" in Philosophy. Questions on reality, God, self, mind, knowledge, values and freedom will be explored, and the great philosophers and schools of philosophy will be introduced. This is a 1.5-hour class three times a week during the Winter Session. 3 credits.	Mon & Wed	4:00 PM – 5:30PM
PHYS 1027A	**Special Topics in Forensic Science, Part II** The term forensic science has a broad meaning encompassing many different disciplines as they apply to legal issues. In Part I of the course students were introduced to some of the specialized fields of forensic science, the principles of science and technology upon which they were based, and the application of these principles to various analyses of crime scene evidence. Part II delves further, looking at contemporary issues that encompass the field of forensic science. Topics will include techniques to analyze fire and explosive debris, forensic pathology, forensic entomology, forensic psychology, forensics and the internet. In addition ethical conflicts facing forensic scientists working in the legal system are explored. This is a 3-hour lecture each week during the Winter Session. 3 credits.	Mo	7:00 PM – 10:00 PM
PSYC 1107B	**Introduction to Psychology: Individual and Social Bases of Behaviour** This course provides an introduction to the field of psychology in terms of the interaction between people and their social environments. Emphasis is placed on child development, personality and social behaviours. Further topics may include psychopathology, motivation and emotion and other relevant issues. This is a 3-hour lecture each week during the Winter Session. 3 credits.	Tu	7:00 PM – 10:00 PM
