

WHY GEOGRAPHY AT ALGOMA U?

Our four-year geography program is ideal for students interested in geographic information systems (GIS), remote sensing, climate change, environmental sustainability, research, and urban regional development.

Our program provides students with skills that go beyond the study of geography, including a broad understanding of numbers and numeracy, writing and research, and data presentation. Geography enthusiasts will appreciate the rich environment in which Algoma University is located. The natural landscape is marked by the St. Mary's River and the Great Lakes, as well as mountain ranges, valleys, and highlands. Our geography isn't limited to just physical spaces, either; the Algoma region boasts cultural diversity, including those of First Nations heritage. In addition, Sault Ste. Marie has also long been known throughout history as a "meeting place" and we are located directly on the border with Michigan.

Our program is aided by small class sizes, which affords students more one-on-one

time with our dedicated faculty. Our faculty are highly-qualified and are committed to teaching, research, and student success. Our program produces top quality graduates, many of whom continue onto higher education, and others who secure meaningful employment in both the public and private sectors, locally, nationally, and internationally. Although we are a small department by provincial and national standards, we are able to make significant and lasting contributions in both our teaching and research.

COURSE HIGHLIGHTS

The Field Practicum course is intended to provide third and fourth year honours students, and students in the geomatics certificate program, with relevant work and practical experience within the governmental and private sector. A priority is to place students in positions in the Algoma district, aboriginal settlements, and other parts of Northern Ontario. However, opportunities in areas outside of Northern Ontario, including overseas, will be followed. Flexible paths for placement are utilized.

LEARNING OUTCOMES

- Analyze the earth as an integrated human-environment system.
- Reflect critically upon the scope and evolution of the diverse discipline of geography.
- Recognize, synthesize and evaluate diverse sources of knowledge, models, and approaches pertinent to studying environment issues.
- Collect and analyze geographical data and interpret its significance within the context of human-environment relations.
- Communicate geographical concepts and data using oral, written and visual forms.
- Collaborate effectively as a team leader and team member to pursue innovative solutions.
- Identify and address geographical questions using creativity and critical thoughts.
- Investigate complex real-world challenges using appropriate concepts, methods, and tools from one or more geographical sub-disciplines.
- Explain societal relevance of geographical knowledge and apply it to real world issues.

WHY STUDY AT ALGOMA U IN SAULT STE. MARIE?

Algoma U is located in Sault Ste. Marie, a city of 75,000 people in Northern Ontario. "The Soo", as locals call it, has all the amenities of a big city – shopping, entertainment, sports teams, festivals, and cultural activities – but without the hassle of traffic.

We're lucky enough to live in a city surrounded by the great outdoors. With Lake Superior and the St. Mary's River literally just steps from our front door, there's always something to do. You can catch some sun at the beach or walk our beautiful boardwalk. With the highest elevation in Ontario, Searchmont Resort is a popular winter destination for our students, offering great alpine skiing and snowboarding.

ADMISSION REQUIREMENTS

ENG4U
Minimum 65%.

Applying to Algoma U is simple. We're ready to help answer all of your questions and more. Before you know it, you'll be walking across campus to your first class.

AFTER GRAD?

After completing a degree in Geography, students are open to an array of career paths and opportunities.

Many of our students pursue graduate programs and go on to pursue exciting careers in many areas.

Graduates can and have pursued:

- Aerial Photo Interpreter
- Cartographer
- Data Analyst
- Economic Analyst
- Energy Administrator
- Environmental Researcher
- Forestry Analyst
- Geographer
- GIS Analyst
- Location Analyst
- Meteorologist
- Park Ranger
- Remote Sensing Specialist
- Education
